# ATUL KUMAR DUBEY

Data Analyst | SQL • Python • Power BI • Snowflake
+91 7300681149 | dubeyatul0490@gmail.com |

## PROFESSIONAL SUMMARY

Data Analyst with hands-on experience building SQL-based reporting, cloud data pipelines (Snowflake, PySpark), and Power BI dashboards. Skilled at translating raw operational and product data into clean, analysis-ready datasets and actionable reports. Seeking to apply strong SQL, Python, and BI skills to drive data-informed decisions.

## EXPERIENCE

**GIS Data Analyst** | *Geohunt Solutions Pvt. Ltd.* **Apr 2026 – Sep 2026**

- Wrote SQL queries using joins, aggregations, and window functions to support geospatial project reporting, and cleaned/transformed raw project data using Python, Pandas, and PySpark, improving data readiness for analysis.
- Built and maintained data-quality checks across RAW, STAGING, and ANALYTICS layers on Snowflake, reducing downstream errors in reporting datasets.
- Built Power BI dashboards and DAX-based reports used by the team to track project metrics; maintained documentation and version control via Git/GitHub for reproducible workflows.

**Server Engineer** | *Allied Digital Services* **Jan 2025 – Apr 2026**

- Wrote complex SQL queries (joins, subqueries, CTEs, window functions) to support reporting needs, and performed database backup and recovery (full, differential, transaction log) to safeguard data integrity.
- Produced daily, weekly, and monthly Excel/MIS reports using VLOOKUP, XLOOKUP, Pivot Tables, and data validation, streamlining reporting for stakeholders.
- Configured and secured 100+ laptops/desktops (domain join, encryption, endpoint protection) and resolved Windows, networking, VPN, and domain issues, maintaining system uptime and compliance standards.

## PROJECTS

**Product Analytics Data Pipeline** — *Python, PySpark, SQL, Snowflake, Git/GitHub*

- Built an end-to-end data pipeline extracting live product data from the DummyJSON Products API using Python and Requests, then cleaned and transformed it with Pandas and PySpark into Parquet format.
- Implemented automated data-quality checks for missing fields, duplicate IDs, and invalid prices/stock/rating/discount values, improving dataset reliability before warehouse load.
- Designed a Snowflake RAW/STAGING/ANALYTICS warehouse with a star schema (DIM_PRODUCT, FACT_SALES) and wrote SQL analytics using CTEs, joins, GROUP BY, CASE WHEN, and window functions (ROW_NUMBER, RANK, LAG, SUM OVER).
- Delivered analytics marts and a Snowflake view for product, inventory, pricing, and rating analysis, with Power BI planned as the reporting layer; documented repeatable pipeline steps on Git/GitHub.

**Data Analytics Certification Project** — *AccioJob | Excel, SQL, Power BI*

- Completed the AccioJob Data Analyst Certification Program, gaining hands-on expertise in Advanced Excel, SQL, and Power BI.
- Executed end-to-end data cleaning, transformation, visualization, and reporting workflows, and built interactive dashboards to support business decision-making.

## TECHNICAL SKILLS

- **Data Visualization:** Power BI, DAX, interactive dashboards
- **Database & SQL:** Joins, CTEs, subqueries, window functions, aggregations
- **Programming:** Python, Pandas, PySpark
- **Cloud Data Warehousing:** Snowflake (RAW/STAGING/ANALYTICS), star schema design
- **Excel:** VLOOKUP, XLOOKUP, INDEX-MATCH, SUMIFS, COUNTIFS, Pivot Tables, Conditional Formatting
- **Tools & Version Control:** Git/GitHub, ServiceNow (basic)

## EDUCATION

**B.Tech, Computer Science and Engineering** Aug 2021 – Aug 2024

*Shambhunath Institute of Engineering and Technology, Prayagraj, Uttar Pradesh — CGPA: 6.8*

## CERTIFICATIONS

- Data Analyst Certification – AccioJob (SQL, Power BI, Advanced Excel)
